

# Accredited by Eskom on the Solar Water Heating Rebate Programme

Make sure your supplier AND system are registered on the Eskom Programme to enable you to claim a rebate.

The Eskom Solar Water Heating Programme is driven by government which has set a target for renewable energy to contribute 10 000 gigawatt hours (GWh) of final energy consumption by 2013.

Solar water heating could contribute up to 23% of this target. Eskom is supporting this drive through the large-scale introduction of solar water heating as it is one of the most effective renewable energy sources available.

## Solar Water Heating 8 Steps to claiming your rebate from Eskom

1. Do your research on solar water heating systems by going on the internet, speaking to suppliers or by calling the Eskom solar help desk on (011) 800-4744.
2. Choose and install an Eskom accredited system supplied by an accredited supplier and their registered installers
3. Ensure that an approved programme timer is installed and set by a qualified electrician
4. Ensure your supplier/installer and electrician fills out the relevant details on your claim form
5. Complete your details on the claim form and attach the required documents (e.g. original invoice, copy of ID, copy of utility bill and/or electricity bill)
6. Within 6 months of date of installation;  
>>Post the claim to facilitating auditors; Deloitte, in the provided self addressed envelope or,  
>>Drop the envelope off in a designated drop box
7. You will receive SMS notification when:  
>>Facilitating auditors receive your application,  
>>When your application is processed and queued for electronic funds transfer or if your application is incomplete and has either been returned or the problem is being rectified by your supplier
8. Payment of the rebate will be made within 8 weeks from date of receipt

**SUNWORX qualifies for Eskom rebate of R 6398**
